

**RAIN  BIRD®**

The Right Choice in Spray Heads  
1800 Series Spray Heads

# 1800 Series Spray Heads

With Rain Bird's 1800 Series Spray Heads, you no longer need to have a green thumb to have a beautiful landscape. These dependable spray heads work like magic to meet all of your yard's watering requirements. Whether they are used in a delicate flower bed or a large grass area, the 1800 Series spray heads will do the job right.

## Outstanding Features:

- Innovative design ensures even water distribution with no brown spots.
- Built-in pressure regulator option eliminates wasteful misting.
- Unique Seal-A-Matic™ option prevents puddling and run-off that can erode a landscape.
- Patented, pressure-activated wiper seal provides optimum pop-up and pop-down reliability, while reducing water waste.
- Wide selection of nozzles allows for a tailored irrigation system and ensures accurate water delivery.

## A Spray Head for Every Landscape

A variety of nozzle sizes and spray patterns means virtually any landscape area is watered easily. The 2", 3" and 4" pop-up heights are perfect for watering most grass areas, while the 6" and 12" models provide superb irrigation for shrubs and flower beds. There are even gentle flows for watering delicate plants and flowers.
